

Trane Carolinas

Trane Operations Center - Blythewood, SC

Renovation project at an existing facility. Design included Rooftop Chilled Water AHU's and fan powered VAV boxes in the office area of the existing facility. Work also included demolishing and replacing the medium pressure ductwork to the VAV boxes and the low pressure ductwork to new ceiling air distribution. Design of the system included fan powered VAV boxes with hot water reheat coils and installing new hot water piping and specialties to new VAV boxes
